

JOB TITLE: *Senior Clinical Project Manager*

ABOUT THE POSITION

This is a newly-created role at Aurion Biotech. It is a unique and exciting opportunity to join a growing team of passionate professionals at the forefront of cell therapy innovation for ophthalmology. As a Senior Clinical Project Manager, you will play a critical role in accomplishing our mission.

The Senior Clinical Project Manager oversees the execution activities associated with the set-up, management and closure of one or more clinical studies and is responsible for the successful completion of studies on schedule and within budget.

KEY RESPONSIBILITIES

- Contributes to the clinical development plan.
- Oversees the execution of assigned studies from conception through study closure and final inspection preparation.
- Participates in the development and review of study documents by internal and external stakeholders (i.e. protocol, ICF template, plans, manuals, site recruitment materials, CSRs, etc.).
- Independently executes vendor identification, selection and management activities.
- Tracks performance metrics of internal and external stakeholders.
- Develops and maintains study timelines and budget and ensures study is appropriately resourced.
- Ensures study training is provided and documented for all study team members.
- Represents clinical operations at project team and other cross-functional meetings.
- Ensures study specific decisions, actions, issues and risks information is documented throughout the lifecycle of the study.
- Conducts quality oversight and PI/KOL/site engagement visits.
- Other duties as assigned.

QUALIFICATIONS AND EDUCATION

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the education, experience, knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.

- Bachelor's degree in health profession, science and/or engineering field.
- A minimum of 10 years of experience in the medical device or pharmaceutical industry, including 8 years of relevant clinical research experience. Some monitoring experience is preferred.
- Previous experience leading a clinical study preferred.

REQUIRED SKILLS, KNOWLEDGE, AND ABILITIES

- Excellent written and oral communication skills.
- Excellent organizational skills and attention to detail.
- Ability to apply knowledge of GCP and applicable regulations and guidance appropriately.
- Proficient use of MS Office products.
- Ability to meet deadlines, adapt to rapid changes, and work in a fast-paced team environment.
- Ability to work effectively both independently and with other team members.
- Some travel would be required for educational seminars, study oversight and site engagement visits. Ability to travel approximately 50%.

ABOUT AURION BIOTECH

Based in Seattle and Boston, Aurion Biotech is a clinical-stage biotech company. Our mission is to restore vision to millions of patients with our life-changing regenerative therapies. Our first candidate is for the treatment of corneal endothelial disease, and one of the first clinically validated cell therapies in corneal care. In Japan, we've completed early research, dose ranging and confirmatory clinical studies; and we have submitted an NDA to the PMDA. In the US, we are preparing an IND submission to the FDA, to initiate clinical trials. We are growing rapidly and seek to hire highly motivated candidates from diverse backgrounds, cultures, and experiences, who share our values:

Stewardship: We make the world a better place for our patients, our communities, our clinicians, and our colleagues. We act responsibly as individuals, as employees, and as a company.

Transformation: We embrace our challenges, our successes, and our failures. We are curious, we take risks, and we collaborate.

Grit: We break down walls and strive to achieve the impossible. We are persistent and resilient, and we deliver on our commitments.

Aurion Biotech has a lot to accomplish in the next few years and this role is key to our success.

The company is backed by leading ophthalmology investors, including Deerfield Capital, Alcon, Flying L Partners, Visionary Ventures, KKR's Falcon Vision Fund, and Petrichor. To learn more, visit www.aurionbiotech.com.
